WHAT IS THIS PRODUCT?

Type

This product is an investment fund in a contractual form under Swiss law.

Objectives

The fundamental investment objective of the fund is to provide significant long-term capital appreciation by investing primarily in a well-diversified portfolio of quality U.S. common stocks. The fund pursues an active and conservative investment policy, independent of any sector orientation or other restrictive methodologies. The strategy is not based on the current market consensus, but examines the intrinsic value of those companies in comparison of their growth potential. Management focuses on the value of the company, based on extensive company analysis and industry research. The fund avoids market excess and is concentrated within 30-40 stocks with the most potential.

Intended retail investor

This fund applies to retail investors with a basic financial understanding, who can accept a possible loss on the investment amount. The fund is aimed at growing the investment value, while granting daily access to the capital under normal market conditions. With their investment in this fund, investors can satisfy long term investment needs. The fund is suited to be acquired subject to a test of the investor's financial knowledge and experience. The Product has been established for an indefinite period of time. The Manufacturer may terminate the Product early. The amount you will receive upon early termination may be less than the amount you invested.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Risk Indicator

The risk indicator assumes you keep the product for 7 years. The actual risk can vary significantly if you cash it at an early stage and you may get back less.

The Summary Risk Indicator (SRI) is a guide to the level of risk of this product compared to other products. It is derived from past returns and may indicate how likely it is that the product will lose money as a result of future (unknown) market conditions.

The Summary Risk indicator (SRI) for this product is 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level. The past may be a poor predictor of the future and, hence, the actual risk of losing money may vary significantly.

Be aware of a potential currency risk when your reference currency differs from the currency of the product. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This type of risk is not considered in the indicator shown above.

The Product may be exposed to further risks e.g. operational, counterparty, political and legal, which are not included in the summary risk indicator. Please refer to the prospectus for more detail.

This table shows the money you might could get back over the next 7 years, under different scenarios, assuming that you invest USD 10'000. The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other Products. The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the Product. The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you. The figures shown include all the costs of the Product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

WHAT HAPPENS IF Gutzwiller Fonds Management AG IS UNABLE TO PAY OUT?

This Product is a contractual fund in accordance with the Swiss Collective Investment Scheme Act (CISA). The assets of the Product have to be segregated from the assets of Gutzwiller Fund Management AG. They are deposited with the custodian bank. A default of Gutzwiller Fonds Management AG does not have any impact on the value of your investments in the Product.

WHAT ARE THE COSTS?

Costs over time

The Reduction in Yield (RIY) show what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs. The amounts shown here are the cumulative costs of the product itself, for three different holding periods and in each case based on the moderate scenario set out in the performance scenarios. They include potential early exit penalties. The figures assume you invest USD 10'000. The figures are estimates and may change in the future. The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and show you the impact that all costs will have on your investment over time.

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

Recommended Holding Period: 7 years

The Recommended Holding Period (RHP) of this Product is 7 years which is the period over which an investment into the Product is expected to break-even. Please note that this is not guaranteed. The more your actual holding period differs from the product's Recommended Holding Period, the more your actual risk of losing money will deviate from the product assumptions. If you wish, you can redeem before the RHP at the Net Asset Value of the Product. Also, you might have needs and constraints implying a completely different holding period suitable to you. Thus, we recommend you to discuss this point with your financial advisor. The investor can redeem their fund units on every bank business day.
